

# HOW TO MEASURE YOUR HELMET FOR THE RIGHT FIT

- 1 Place a soft tape measure about 1" (2.5 cm) above your eyebrows and encircle the largest part of your head
- 2 Pull the tape so that it feels snug, but not tight
- 3 Read the length and repeat for good measure
- 4 Use the largest measurement of the two

## HOW TO TELL IF YOUR HELMET FITS CORRECTLY

Grab your helmet, pull each chinstrap outwards, and slide your head in. It's normal for it to feel a bit tight at first, especially if you're new to helmets. This snugness is essential for optimal safety during your Can-Am adventures. **If your helmet tilts forward, comes down over your forehead or moves side to side, then it's too big and you should size down.** Don't worry—new helmets will break in over time for a perfect fit.
